PROFESSIONAL SUMMARY

Results-driven Data Analyst with 3+ years of experience in SQL, Python, Power BI, and Business Intelligence reporting. Skilled in data analysis, dashboard development, KPI reporting, exploratory data analysis (EDA), statistical analysis, A/B testing, hypothesis testing, funnel analysis, data modeling, and reporting automation. Strong expertise in SQL optimization, Power BI dashboards, DAX, ETL concepts, stakeholder reporting, business analytics, and operational analytics. Hands-on experience with Pandas, NumPy, Scikit-learn, regression analysis, customer segmentation, data validation, workflow automation, and trend analysis. Familiar with Snowflake, Figma, Wireframes, Jira, Agile/Scrum, and UI/UX workflow understanding.

TECHNICAL SKILLS

- Programming & Analytics: Python, Pandas, NumPy, Scikit-learn, Exploratory Data Analysis (EDA), Statistical Analysis, Hypothesis Testing, A/B Testing, Regression Analysis, Machine Learning Fundamentals
- SQL & Databases: SQL, MySQL, T-SQL, Azure SQL Database, CTEs, Joins, Subqueries, Window Functions, Stored Procedures, Views, Triggers, Query Optimization
- BI & Visualization: Power BI, DAX, Tableau, Dashboard Development, KPI Reporting, Data Visualization, Excel (Advanced Excel, Pivot Tables, Power Pivot), Looker (Familiar)
- Data Engineering & Modeling: ETL Concepts, Data Pipelines, Star Schema, Data Modeling, Workflow Automation, Snowflake (Familiar)
- Product & Business Analytics: Funnel Analysis, Product Metrics, Customer Segmentation, Trend Analysis, Ad-hoc Analysis, Reporting Automation, Business Intelligence Reporting
- UI/UX & Collaboration: Wireframes, User Flows, UI/UX Workflow Understanding, Figma (Familiar), Jira, Agile / Scrum

PROFESSIONAL EXPERIENCE

Infosol Technosol Pvt Limited | Data Analyst | May 2023 – Present | Bengaluru

- Developed 15+ interactive Power BI dashboards and KPI reports for operational analytics, stakeholder reporting, and business intelligence reporting.
- Wrote optimized SQL queries using CTEs, Joins, Subqueries, Window Functions, Stored Procedures, and aggregations for large dataset analysis.
- Performed exploratory data analysis (EDA), statistical analysis, trend analysis, hypothesis testing, and A/B testing using Python, Pandas, and NumPy.
- Built DAX measures, KPI metrics, calculated columns, and analytical measures to improve dashboard reporting and business performance tracking.
- Conducted data cleaning, preprocessing, reconciliation, and validation to improve data quality, reporting accuracy, and consistency.
- Worked on funnel analysis, customer behavior analysis, and product metrics analysis to identify business insights and optimization opportunities.
- Collaborated with stakeholders and cross-functional teams to gather reporting requirements and deliver data-driven analytical solutions.
- Supported ETL workflow simulations, workflow automation, data transformation, and reporting automation processes.
- Created business reports, analytical summaries, and ad-hoc analysis reports to support strategic and operational decision-making.
- Assisted in UI/UX workflow understanding, wireframe discussions, and reporting layout improvements using Figma references.

PROJECTS

FirstCry — E-commerce Pricing & Funnel Analysis

- Performed funnel analysis from visit → cart → checkout → purchase using SQL and Python to identify customer drop-offs and conversion trends.
- Conducted A/B testing and hypothesis testing to evaluate pricing strategies, discount impact, revenue growth, and customer retention.
- Built KPI metrics including conversion rate, retention rate, profitability tracking, revenue analysis, and customer behavior analysis.
- Used SQL queries with CTEs, Joins, Subqueries, and Window Functions for cohort analysis and reporting automation.
- Generated business insights and recommendations to improve campaign targeting and conversion optimization.

Awesome Chocolates — Sales Dashboard Analysis

- Designed interactive Power BI dashboards using star schema data modeling techniques and dashboard visualization best practices.
- Created DAX measures and KPI dashboards for sales analysis, category performance, MoM growth, profitability tracking, and trend analysis.
- Implemented filters, drill-through, slicers, bookmarks, and interactive visuals for business intelligence reporting.
- Analyzed regional and product-level sales trends to support stakeholder reporting and business decision-making.

KreditBee — Customer Segmentation Analysis

- Applied K-Means clustering using Scikit-learn for customer segmentation and behavioral analytics.
- Performed EDA, data preprocessing, feature engineering, and statistical analysis using Pandas and NumPy.
- Identified high-value and low-value customer segments and generated analytical business insights for targeted marketing strategies.
- Worked on data cleaning, data validation, and reporting workflows for analytics readiness.

Business Intelligence Reporting Automation

- Built automated reporting workflows using SQL and Power BI to improve reporting efficiency and KPI tracking.
- Implemented data validation, reconciliation, and workflow automation processes to improve reporting consistency and accuracy.
- Developed operational dashboards and analytical reports to support business analytics and management reporting.

PROFESSIONAL HIGHLIGHTS

- Developed and delivered 15+ Power BI dashboards for KPI monitoring, operational reporting, and business intelligence analytics.
- Strong expertise in SQL querying, DAX, dashboard analytics, statistical analysis, reporting automation, and stakeholder communication.
- Hands-on experience in EDA, A/B testing, hypothesis testing, customer segmentation, business analytics, and trend analysis.
- Familiar with Snowflake, Tableau, ETL concepts, cloud-based analytics environments, and workflow automation processes.
- Strong analytical, problem-solving, communication, and cross-functional collaboration skills.

EDUCATION

B.Tech — Electrical Engineering | Sri Venkateswara College of Engineering, Tirupati

ADDITIONAL KEYWORDS

Power BI Developer, Data Analyst, Business Intelligence Analyst, Product Analyst, SQL Developer, KPI Reporting, Dashboard Development, Data Visualization, Operational Analytics, Business Analytics, Data Transformation, Data Validation, Reporting Automation, Data Cleaning, ETL Workflows, Trend Analysis, Stakeholder Reporting, Customer Analytics, Analytical Problem Solving, Decision-Making Support.
